Cube Surface Program

Author: Kyle Warchuck
Date: 9/6/17
This program calculates the area of one side of the
cube, the surface area of the cube and the volume of
the cube then outputs all the variables

Pseudocode

Start
  Input Face
  set FaceArea = Face * Face
  set totalarea = 6 * FaceArea
  set totalvolume = Face * Face * Face
  output FaceArea
  output totalarea
  output totalvolume
Stop

Start

Input Face

set FaceArea = Face * Face

set totalarea = 6 * FaceAarea

set totalvolume = Face * Face * Face

output FaceArea

output totalArea

output totalvolume

Stop
